We are looking for a

Student Assistant

**DESCRIPTION** The neuroplasticity and motor recovery group at the Institute’s Department of Neurology is seeking a motivated and enthusiastic student assistant (**starting: 01.04.2018**). Our group investigates basic neuroplastic mechanisms of sensorimotor functions in healthy subjects and their modulation in neurological disorders such as stroke. Different training interventions are used and their effects characterised using non-invasive brain imaging techniques (MRI, EEG).

**WE OFFER**
- Involvement in a highly interdisciplinary and international research environment
- Comprehensive insight into clinical neurosciences, hands-on experience working with stroke patients
- Possibilities for further professional development and methodical competence

**TASKS**
- Independent execution of study preparations and participant recruitment
- Participation in data collection and analysis

**REQUIREMENTS**
- Studying medicine, psychology, or related field
- Ability to work responsibly and independently
- Ability to work in a team
- Experience with patients is favourable
- Data analysis experience with appropriate software packages (e.g. SPSS, R, Matlab, SPM, ...) is favourable
- Willing to be trained in various clinical assessments (e.g. Fugl-Meyer, Jebsen-Taylor)
- Excellent command of German and English
- Long-term involvement (min. 6 months)

Estimated at **10 hours per week**

Your complete application should include a CV, personal statement, and references as a single PDF document to:
